OCTOBER 2018

TRAINING UPDATES:

GENERAL:

GET OUT AND VOTE!

September 30, 2018

Page 2

As Mid-Term elections loom, bump your family and friends to vote. A confirmation message needs to be sent to the liberals of our country that conservatives are still unified and still have a voice.

Look at the Kavanaugh hearings and what a debacle our system has become. Liberals need to be held accountable. Further, conservatives need to go on the attack and not lay back like the world is at their feet. The pressure needs to be kept up until the swamp is drained and then vigilance needs to be pursued unless we want a repeat of Obama.

In Texas, we have a liberal retard nicknamed “Beto” who needs to be stopped cold in his tracks. This nitwit liberal scumbag was propped up and protected by his crooked family. Is the best the liberals can do? They are scraping the bottom of the barrel with this douche bag.

I have no kind words for the liberals of our country. They are vile, evil rudderless ship that needs to sink. We just need to help them along. Vote....

OF FOOTBALL AND OTHER UNPROFESSIONAL ATHLETES:

First, I don't watch and really care. They are overpaid ball monkeys (of all races and color) who feel their sports job makes them an expert on life, politics and oppression. I would not know an NFL player on the street if I were I to pass one by. They are non-issues in my life. If people put our country first, both attendees and advertisers, sport personality views would become non-existent and fold.

We have bigger issues such as the corruption in our government and in the Catholic Church which I consider the biggest pedophile ring in the world. Sorry if it hurts. Someone needs to act before more kids and adults are physically hurt. The pope is a joke and not a leader. Cut their tax-exempt status in the U.S. unless they fix their problems. If not, give the good priests a Romana Gladius short sword and a hunting permit to take out one bad priest, maybe even two if the problem is that widespread. I think Jesus would understand.

Predators going into the Church as a hunting ground to reach their victims is unacceptable. What is more unacceptable is the current Church leadership allowing it to happen.

FUTURE CLASSES

Beginning in the Winter, I am looking at offering a **Conceal Carry Tac Pistol Course**. The class will be shot from concealed carry and be an intermediate to advanced level class. My plan is to review the basics the first morning and then transition to moving and displacing people in the afternoon. You have to create space sometimes before you can draw.

The course would then move to the Shoot House the next morning and incorporate moving and displacing Bad Bobs as you move to solve tactical problem, probably active shooter based. We want to offer a realistic “How To” for concealed carry users.

Page 3

The next course that has been requested is a **Rifle Advanced Individual Tactics Course**. This would mirror the pistol AIT, but use rifle lights at night to solve problems. Night courses of fire would be shot in the afternoon for practice and switch manipulation. The final half day would consist of short tactical scenarios.

LE CORNER

Reference last months Training Notes about Sims and training. We would not send pilots to fly combat missions after only being in a training simulator. They have to fly real planes and drop real bombs first. The same applies to sim and live fire shoot houses. Both need to be factored into training.

By doing only “sims” exercises and then saying you’re trained to get into a gun fight is total BS.

Next, it has been suggested that I run **two-day SWAT Eval/Training seminar** for teams who want an honest assessment and training boost.

The concept would be a team comes in and runs a series of simple, job related training modules and then critiqued and shown how to fix issues. This would target the Individual, Team Leader, Snipers and Tac Commander as well. Shoot me an e-mail if you are interested. The barracks would be made available.

Finally, I am looking at making the **Patrol Counter Ambush** course a four-day **Instructor Course** as that is what officers are doing that are attending. They are taking the information back home.

EQUIPMENT

Wanting to start shooting the 6.5 Creedmoor, I gave Remington a chance as I wanted a short rifle for the back trails and if I see something at several hundred yards. The 783 in 6.5 Creedmoor is Remington’s feeble attempt to compete with the Ruger American market. It has a 16” barrel.

I can easily outshoot it with a magnified scope and have put a red dot on it as I think 300 yards is it’s hunting max without considerable work on the internals/stock. The stock touches the barrel in two major points. The stock could also be fishy/loose. It is 1.5-2 inches at 100 is what it is good for out of the box with Hornady 143 ELD-X. It will hit out to 500/600 but is squirrely and drifts right. It does the same on a pasty at 100.

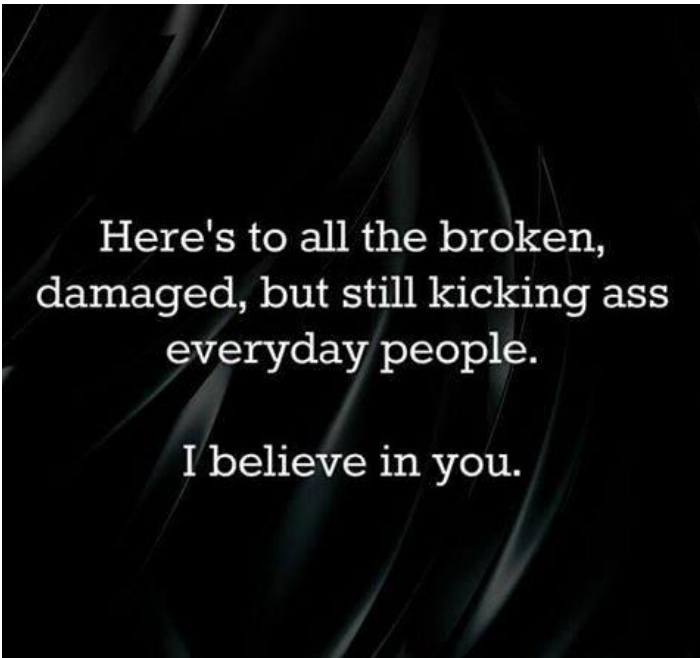

Feeling like I over-scoped a cheap rifle, I removed the stock, rasped out spots where it was touching the barrel and topped it with an AT3 Red Dot sight. My plan is to make it my 1-300 yard brush and hog gun and not put any more time or money into it. I will save my scope for a worthy rifle.

More to follow on the accuracy/zeros/hold.

If you want an out of the box rifle and at good price, go Ruger American.

IN CLOSING

Thanks and we look forward to seeing you on the range.

Paul R. Howe
